

Ameerah Diwan

BSc (Hons) Mathematics with Data Science graduate from City St George's, University of London with experience in machine learning, artificial intelligence and data analytics using Python, SQL and Power BI. Currently completing the ITOL AI Engineering Programme, developing practical skills in software engineering, cloud computing, AWS, data engineering and AI application development through hands-on projects. Passionate about applying AI and data-driven solutions to real-world challenges.

KEY SKILLS

Programming: Python, SQL, MATLAB, Excel VBA

Data Analysis and Visualization: Pandas, NumPy, Power BI, Tableau, Matplotlib, Seaborn

ML & AI: Scikit-learn, TensorFlow, Machine Learning, NLP, Prompt Engineering, Retrieval-Augmented Generation (RAG), Sentiment Analysis.

Cloud Computing & Software Engineering: AWS (currently studying), Streamlit, Git, GitHub, VS Code, Jupyter Notebook.

Data Engineering: Data Cleaning, Feature Engineering, ETL Fundamentals, Data Processing.

CURRENT AI ENGINEERING PROJECTS (In progress)

- Car Price Prediction Web Application – Developing a machine learning application using Python and Streamlit to predict vehicle prices.
 - Sentiment Analysis System – Building a natural language processing (NLP) model to analyse and classify text sentiment.
 - Retrieval-Augmented Generation (RAG) AI Assistant – Developing an AI assistant using large language models, prompt engineering and external knowledge retrieval.
 - Machine Learning Classification Project – Applying supervised machine learning techniques to solve real-world predictive problems.
 - SQL & Data Engineering Project – Designing and querying relational databases while implementing data preparation and processing workflows.
 - AWS Cloud Deployment Project – Learning to deploy AI and data applications using AWS cloud services.
 - Python Software Engineering Project – Developing Python applications using software engineering principles, testing and debugging techniques.
-

DATA RELATED EXPERIENCE

Lloyds Work experience - Data Analytics & Auditing (July 2025)

- Gained exposure to data-driven decision-making in financial operations and customer engagement.
 - Shadowed data, analytics, and technology teams, observing real-world applications of analytics in banking.
 - Attended management meetings and learned best practices for cross-functional collaboration.
 - Developed professional communication and networking skills within a leading financial institution
-

Uptrail Data Analysis- Internship (July 2025)

- Analyzed real-world data and created dashboards using Python, SQL, Power BI, and Tableau.
 - Produced reports to identify trends and support business decisions.
 - Gained experience in data governance, compliance, and industry best practices.
 - Received mentor recommendation and relevant certifications.
-

Independent Projects- Data and Machine Learning (June 2025)

- Completed end-to-end data analysis and machine learning projects using Python, SQL,

TensorFlow, Pandas, and scikit-learn.

- **App Market Analysis:** Analysed 10,000+ App Store and Google Play records using Python, SQL, and Power BI to identify market trends and monetisation opportunities.
- **NLP Chatbot:** Developed a chatbot with intent recognition and conversational capabilities using TensorFlow and Natural Language Processing.

Data Job Simulations (June 2025)

- Completed data analytics job simulations with Lloyds Banking Group, British Airways and Deloitte, developing practical skills in customer insights, risk analysis, business analytics and data storytelling.

Data analysis and programming with real world dataset- (March 2025)

- **TfL Cycling Data Analysis | Python, Pandas, Seaborn-University Project**

Cleaned and aggregated 2014–2019 datasets to identify peak usage trends and predict congestion using decision tree regression.

Data Analysis and Automation with Excel VBA -University Project (November 2024)

- **Excel VBA Automation | Excel VBA**

Developed macros to automate data analysis tasks, implement conditional logic, and create interactive dashboards.

EDUCATION

ITOL AI Engineering Programme (In Progress)

Current modules: Python Software Engineering, SQL, Data Engineering, Cloud Computing, AWS Cloud Practitioner, Machine Learning, AI Prompt Engineering, Retrieval-Augmented Generation (RAG), Streamlit, Application Development, Sentiment Analysis and AI Ethics.

City St George's, University Of London (2023-2026)

BSc Mathematics with Data Science – (Graduated 2026)

Relevant modules: Artificial Intelligence, Machine Learning, Principles and techniques of Data Science, Statistical Modelling, Graph Theory and Data Visualisation.

Seven Kings School, Ilford - Alevels (2021-2023)

Psychology : A* | Religious Studies: A | Mathematics: C

Seven Kings School, Ilford-Gcses(2016-2021)

Business: 9 | Religious Studies: 9 | Mathematics: 7 | Computer Science: 6

English Language & Literature: 6 | Double Science: 6

OTHER EXPERIENCE

Santander – Supported customer research and data reporting using Excel and PowerPoint.

Savanta – Contributed to market research projects and data collection.

Head Start Learning – Tutor.

Tronseal Ltd – Administrative Assistant
